The Bugs from Brazil! (Unusual Applications)

WALTER Solutions are sometimes used in unusual applications. Although we do not highlight most of these uses when promoting our products, we thought that we would share with you two of the more unusual places that you might find WALTER Solutions at work and one practical application that we can use ourselves.

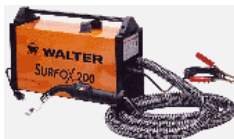

COOLCUT™ - Straight from the horse's mouth!

Our Coolcut™ sanding discs are the only ones that have been approved by a local veterinarian to sand horses' hooves. Clogging was the problem with the competition. So the next time that you are on horseback and you notice that your horse needs a pedicure, consider the opinion of a professional.

Gold Matrix™ – Bug control

There is a saying in Brazil that, “either Brazil kills the ants or the ants will kill Brazil”. There are numerous tiny little ants, which you can find almost everywhere, particularly where humans live. They can infest your kitchen, in search of anything that contains sugar. Gold Matrix™ is the best solution to eliminate this kind of plague. Simply spray the product in the ants' path, and they are instantaneously killed. It works as fast as Dr Freeze's (see Batman III) freezing ray! It also prevents them from coming back. In a way, we could say that our alkaline solution works as an "ANTacid" that neutralises ants.

Inox Protect™ – Maintaining SURFOX™ Machines

This product has been used with great results in the maintenance of SURFOX™ machines. It is excellent in cleaning and protecting electrical cables, plastic hoses, metallic parts, etc.
