WalterShare! Launch in Argentina

On November 12th, with the presence of Mr. Christian Siregar, we held the Official Launch of WalterShare! in Argentina. All Walter Employees were present, including Sales Representatives located in the Interior of the country. The opening was made by Christian Siregar, who emphasized the importance of this new communications tool for creating synergy between all the participants. The WalterShare initiative is placing the Walter Company on the leading edge of our industry in regards to the productive use of communications technology and peer-to-peer knowledge sharing.

For three hours, and following the contents of the WalterShare CD (knowledge transfer & creation), Enrique Scalabrini engaged everyone in a rich debate, that demonstrated Walter Argentina's a strong commitment to WalterShare. The final step of the meeting was for all of our salespeople to enter a Solutions Report on-line.

Walter S.A. (Argentina)
