50th Anniversary Mini-Grinder™

This Special Edition of the Mini-Grinder will mark Walter's 50th anniversary with a limited time offer. For every purchase of a Special Edition Mini-Grinder, you'll receive a limited edition Mag-Lite flashlight with its own carrying case. As always, the Mini-Grinder combines speed with power to remove more material faster and with less effort. It can be used daily in production and maintenance jobs to blend and finish welds, cut off bolts and remove rust and scale.

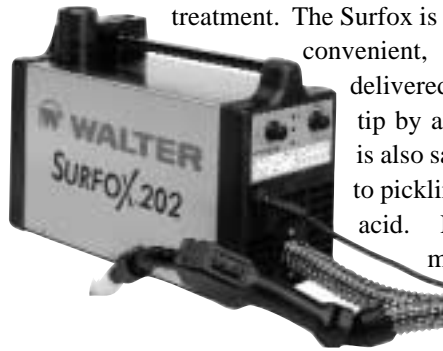

Order No. 30-A 161

Limited time & quantities

Surfox™ 101 & 202

The Surfox cleaning system for stainless steel offers outstanding time savings in restoring a bright finish to welded stainless steel. Surface discoloration (bluing) from TIG welding and spot welds is removed instantly and the original mill finish is not altered, requiring no further treatment. The Surfox is portable, fast (3 feet/min.) and convenient, since the cleaning liquid is delivered automatically to the cleaning tip by an integrated pump system. It is also safe for the operator as opposed to pickling paste, hydrofluoric or nitric acid. Now both the 101 and 202 models have an electrolyte capacity that is more than doubled and a setting for automatic pump cycles.

The Surfox 202 has the additional features of a suction motor that removes vapors at the source for work in confined areas, an exhaust extension and an automatic shut-off when the electrolyte reservoir is almost empty. The 202 model also features adjustable power output to clean sensitive grades of stainless steel and a short circuit protection that eliminates the possibility of burn marks on the work-piece without shutting down power to the machine.

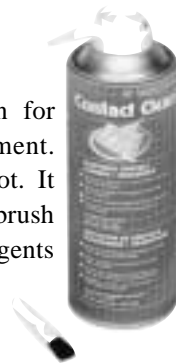

Surfox 101 Order No. 54-D 112

Surfox 202 Order No. 54-D 212

Contact Clean™

This electrical contact cleaner has a fast acting formulation for cleaning and protecting electronic and electrical equipment. It removes contamination such as oil, grease, dust, smoke and soot. It has a dielectric strength of 47,000 volts and an exclusive nozzle brush that removes stubborn dirt effectively. Its special preservative agents prolong service life for the complete care of electrical contacts.

Order No. 400ml aerosol 53-G 522

Duron™

Introducing a new class of industrial angle grinders that have established new levels of performance and comfort for the operator. The new Duron offers more power and speed with a 12 amp motor and is twice as light as large angle grinders. Its exclusive Dustguard™ protection ensures that all electrical components are protected from abrasive particles, thus guaranteeing more endurance. With its full grip rear handle that can be rotated 90° to the left or right, the operator is comfortable while always staying in full control. The new Walter Duron grinder gets more work done faster. Available with or without lock-on paddle switch.

Duron -5" Order No.30-A 350

Duron-6" Order No. 30-A 360

Big 6™

This grinder offers double the grinding output of a standard sander/grinder twice its weight, due to its Dynamax™ electronics which also ensure that the spindle speed remains constant even under load for maximum productivity. Its Powerguard™ motor protection signals high heat, reduces power automatically yet allows the tool to still run for a fast cool down. Its exclusive safety clutch eliminates dangerous torque and backlash so the operator stays in full control at all times.

Order No. 30-A 260

Multi-Layer Core Cut™

This unique line of HSS-Cobalt annular cutters has a special geometry that allows the drilling into stacked material in 1 pass. The Multi-Layer Core Cut offers the same outstanding performance as the regular SST Core Cut. They cut faster and last longer than standard HSS cutters for the highest level of productivity. Produce clean, accurate holes in many layers of steel, stainless steel and other tough metals. For use on portable magnetic drilling units and drill presses. All annular cutters come in 1" and 2" depths and vary from 9/16" to 1 1/16" diameters.

Available Spring 2002
