

Walter Surface Technologies helps customers work better by delivering high performance abrasives, tooling, power tools and welding process solutions specifically designed for metalworking fabricators and maintenance and repair operations.

Walter is the performance category leader in metalworking surface technologies offering:

- Abrasives
- Wire Brushes
- Tooling
- Power Tools (Grinders, Sanders and Drills)
- Industrial Lubricants and Penetrants
- Industrial Cleaners and Degreasers
- Anti-Spatter (Welding)
- Stainless Steel Weld Cleaning
- Stainless Steel Marking (Etching)
- Metrology (Stainless Steel Passivation Test and Measurement)

For the following uses:

- Cutting
- Grinding
- Blending
- Sanding
- Finishing
- Brushing
- Polishing
- Drilling
- Tapping
- Deburring
- Lubricating
- Cleaning
- Degreasing
- Galvanizing
- Marking
- Neutralizing
- Measuring
- Testing

ZIPWHEEL™

The Zipwheel™ is the longest lasting cut-off wheel, boasting the lowest cost per cut compared to all other 3/64" thin cut-off wheels.

ENDURO-FLEX™

The Enduro-Flex™ features an innovative design and exclusive abrasive grain blend that allows it to remove more material than competing flap discs. Plus, its Eco-Trim backing extends disc life—making it the longest lasting flap disc on the market.

XCAVATOR™

Choose the Xcavator™ for aggressive removal rates. It delivers premium performance on steel and stainless steel and can even confront some of the industry's toughest metals, such as tungsten carbide and quenched and tempered steel.

COOLCUT XX™

Speed up production while using fewer abrasives. The Coolcut XX™ features Walter's exclusive Cyclone™ technology to aggressively remove material long after most other sanding discs are spent.

BIG 6 PS™

Get heavy-duty safety with the Big 6 PS™. It comes with a mechanical brake to stop the grinder within two seconds of relieving the trigger. The Big 6 PS™ features the Walter Stabilizer™ to reduce vibration and enable the user to easily cut, grind, sand and finish virtually any type of metal.

LINE-MATE III™

The professional's choice for linear finishing. The Line-Mate™ system features a complete range of innovative abrasives designed to match any linear finish quickly—allowing you to drastically reduce your cycle time.

SURFOX™

The Surfox™ electrochemical weld cleaning system is the safest and most effective method for removing heat tint from welded stainless steel—whether TIG, spot or pulsed MIG, without altering the surface finish.

E-WELD NOZZLE™

An anti-spatter solution designed to coat weld nozzles to allow the free flow of gas. It improves weld quality and reduces consumable spend and operator downtime.

POWER BRUSH LINE

A complete line of high productivity power brushes that are designed to run perfectly balanced and last longer than competitive products.

SST™ TOOLING

A performance drill bit line featuring High Speed Steel (HSS) and a Cobalt blend, along with an exclusive Quick Shank to let you drill more holes, faster!

The Walter corporate tagline: "Only the best™" refers to Walter's commitment to providing customers with the best products, solutions and support to enable them to do their best work.

Partnership in Productivity

“Measurable productivity gains are what businesses are looking for.”

Bucket Program & Productivity Reports

Walter collects used abrasives, brushes and tooling materials from end-user facilities. The contents are analyzed and specific recommendations are made. Detailed productivity reports outlining documented cost savings are also presented.

Safety Seminars & Product Demonstrations

Walter representatives are trained professionals ready to listen, make suggestions, demonstrate products, and let customers see for themselves how well Walter products work. And because safety is key to productivity, Walter provides customized, on-site safety seminars to suit each users' individual needs.

Walter Abrasives App

A step-by-step guide to choosing the right abrasive product for your customer.
