NO ACCESS TO A POWER SUPPLY?

No worries!

The ZIPWHEEL cutter's exclusive Ventilated Charging System provides fast, consistent, long lasting power wherever your work takes you.

Ventilated Charging System Includes:

18V / 5.2Ah Battery Pack

The most powerful battery available on the market with the greatest amperage for added endurance under load. This is the only battery suitable to handle Walter's aggressive 6" cutting wheels for an extended period of time.

Ventilated Charging Station

Extending battery life with an integrated fan to cool down the battery. This allows for faster recharging and helps reduce downtime.

When it comes to power, the **ZIPWHEEL** cutter leads the way in reliability, efficiency and performance!

Max wheel 6"

The only cordless cutter on the market that can power a 6" wheel.

Kit Includes

- ZIPWHEEL cutter
- 25 ZIP ONE 1/32" Cutting Wheels
- 2 Battery Packs
- Ventilated 120V Battery Charging Station
- Back Flange & Front Nut
- Pin Key Wrench
- Closed Guard Adaptor
- Carrying Case

Features

- A 270° rotating rear housing**
Allows you to position the battery for added comfort and convenience.
- B Lightweight**
Even with the most powerful motor, it's still the lightest tool in its category.
- C DYNAMAX™ electronics**
Ensure that spindle speeds remain constant even under load for maximum productivity.
- D LED indicator on the tool**
When lit, it indicates the overload is engaged. When blinking during battery change, it indicates the trigger is in the "ON" position, but will not automatically start for added safety.
- E Electronic clutch**
Safety feature that prevents the wheel from spinning in the event of a jam.
- F Detachable dust filter**
Protects the tool from dust and other particles. Easy to detach and clean to keep your tool working at maximum efficiency.
- G Electronic single cell protection on battery**
Prevents the battery from overloading / overheating. Prevents shortage or other battery issues that may arise.
- H LED indicators on battery**
Clearly indicates the amount of battery power left in increments of 25%.
- I Beveled gears**
Increase the life of the cordless cutter. More durable when under load than conventional straight gears. Reduces noise as gears are perfectly seated together.
- J Front retaining plate**
Prevents misalignment under heavy load and ensures all pieces are kept firmly in place for increased life.
- K Rear bushing**
Absorbs initial impact and reduces vibration while cutting. Provides added stability and comfort during operation.
- L Spindle lock button**
The spindle lock is operated with one hand leaving the other hand free for mounting abrasives and tightening the clamping nut with a single wrench.
- M Power switch**
Safely positioned for cutting operation.

Kit Specifications

Description	Model	Order No.	Max disc dia.	RPM	Spindle thread	Wheel Size Included
ZIPWHEEL cutter Kit	040 KIT	34-A 949	4.5" / 5"	8,000	5/8" - 11	4.5"
ZIPWHEEL cutter Kit	050 KIT	34-A 950	4.5" / 5"	8,000	5/8" - 11	5"
ZIPWHEEL cutter Kit	060 KIT	34-A 951	6"	8,000	5/8" - 11	6"
