# WORK BETTER

## MAY 15 TO AUGUST 15, 2021

### SAFER & FASTER SOLUTIONS

Take advantage of our high quality abrasives, power tools and PPE to improve safety and productivity in your operations. Don't just take our word for it, we will prove it!

Receive a **FREE** on-site consultation from a highly trained Walter Territory Manager. We will provide safety and productivity improvement recommendations, including a detailed cost savings analysis, to help you work better.

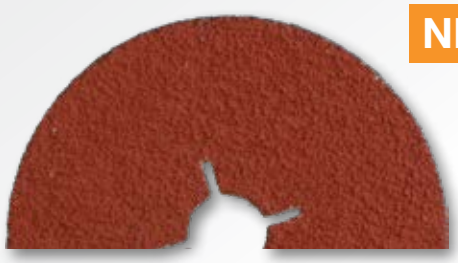
WALTER
Surface Technologies

# DISCOVER OUR SAFER & FASTER SOLUTIONS

NEW!

Remove **70% more** material in total comfort with the XCAVATOR XX™. Its **unique ceramic grain** blend reduces operator fatigue because it grinds for you, helping you work better, faster and safer.

NEW!



Get the job done faster with XTRACUT™; exceptional performance on steel with unique **cooling agents** that prevent burning and distortion. Optimized **self sharpening** ceramic grains ensure a long service life, it's a guaranteed cost saver.

## KEEPING MERCHANDISE MOVING

*McCord Parks*
*Railroad Contractor*
*Montana, USA*

Railroads are one of the most efficient and cost-effective ways to move freight. The United States depends on railroads for the shipment of raw materials and finished goods that fuel economic growth and sustain our way of life.

A lot of work goes on behind the scenes in a railyard — from new track construction and tie replacements, to crossing/switch installations and site repairs.

It's essential work that requires the expertise of a railroad contractor who has the capability to work in rugged terrain. It's work that requires the expertise of someone like McCord Parks. As foreman for a railroad contractor, he has been building private and industrial railroads across the United States over the last 10 years.

Parks understands that in order to do his job correctly, safety is key.

When he selects tools and equipment, Parks not only looks for companies that take safety seriously, but he also considers the ruggedness and reliability of the tools, as well as their ability to perform in harsh environments and conditions. With that in mind, he uses WALTER's ZIP WHEEL™ cut-off wheels when building attachments for railroads, as well as the jigs that help build railroad panels.

Known for their fast removal rate and long service life, WALTER products allow Parks to cut faster over longer periods of time. The ZIP WHEEL™ also provide Parks with the durability that he requires when working on job sites. The heavily reinforced wheel is more forgiving and resistant to accidental impact. In fact, Parks says that he has never had a WALTER cut-off wheel break. That is why he trusts WALTER to get the job done!

# CUTTING

## ZIP WHEEL™

Safe, fast and reliable cutting

Steel Stainless
