“Only the best”

PRECISION MAPLE TAPPING; EXCEPTIONAL RESULTS.

*Specially made for
maple tree tapping*

Producing the finest maple syrup in the world is a rigorous process, one that takes months of advanced preparation and planning.

Be well equipped to begin your maple tree tapping process with Walter's SST-M drill bits, ergonomically designed to pierce frozen and non-frozen wood, and remove material at a faster rate.

Each drill bit is made with industrial high speed steel, fortified with cobalt, and coated with a special formulation to ensure the product lasts longer and resists deformation. Using a specific fluting with a point-angle design prevents heating and guarantees a more pure maple tree tapping process.

Designed in Canada, with a true Canadian understanding of maple syrup. The **SST-M** will get the job done.

PRODUCT FEATURES

- // EXCLUSIVE HIGH SPEED STEEL AND COBALT CONSTRUCTION ENSURES LONG LIFE AND PREVENTS DEFORMATION
- // VACUUM DEPOSITION PROCESS CREATES UNIQUE COATING LAYER THAT SPEEDS CHIP EVACUATION IN BOTH FROZEN AND NON-FROZEN WOOD
- // FLUTING SPECIFICALLY DESIGNED FOR QUICK DRILLING AND EASY REMOVAL TO ELIMINATE OVERHEATING
- // QUICK SHANK WITH 6 LONG FLATS ALLOWS FOR EASY MOUNTING AND PREVENTS SLIPPAGE
- // DEPTH INDICATOR ALLOWS FOR PRECISION DRILLING EVERY TIME
- // DRILLS MORE HOLES FASTER

OFFERED IN 6 SIZES
THE SST-M CORRESPONDS TO ALL
STANDARDIZED DRILL BITS THAT
ARE TAPPED INTO TREES

PACKAGING
SOLD INDIVIDUALLY IN A
RE-USABLE PACKAGE
